

DEPT. OF MENTAL HEALTH.

A Guide to Mental Health and Mental Retardation Resources for Children

GOVERNMENT DOCUMENTS

COLLECTION

OCT 13 1978

UNIVERSITY OF MASSACHUSETTS

Region I -- Western Massachusetts

U OF MASS/AMHERST LIBRARY

June 1978

Introduction

This listing of programs for children, birth to 22, has been compiled by Region I staff of the Department of Mental Health. It is hoped that it will be useful to agencies and individuals providing services for children with special needs.

The programs and services for children listed are all physically located in Western Massachusetts which is divided into the five geographic Mental Health areas of Region I. Each program is described in the area section in which it is located. Area I Berkshire, Area II F/H, Area III H/C, Area IV Springfield, Area V Westfield.

The guide presents the programs under the Five Basic Mental Health Services for Children:

1. Prevention, Consultation and Education
2. Outpatient Services - Day Treatment and Schools for Special Needs
3. Semi-Inpatient Services - Group Homes and Foster Homes
4. Inpatient Services - Residential Treatment
5. Emergency Services and Respite Care

Some programs appear in several different sections since they provide more than one type of service. For each resource the following information is presented in three columns:

I	II	III
Name of Program	Services Provided	Funding Source
Operating Agency Address	Age Range	
Phone Number	Specific Population Served	

Although great effort has been made to include all appropriate programs, there may be omissions and inaccuracies. The guide will be updated annually, so suggestions are welcomed. Please contact the Department of Mental Health Office of your area to request changes and report new services to be added.

This first edition is limited to 100 copies which will be issued to Area and Regional Offices of the Human Service Agencies and to other departments which serve children with special needs.

We wish to thank all who worked to prepare the guide: Area and Regional staff members, the editor, the typist, the printers, the collators, the hole driller, and those who assisted in the distribution.

Mental Health and Retardation Services in Region I are increasing. With help from all - parents, agencies, legislators, cities and towns, the Commonwealth, and the federal government - we can work toward the goal of appropriate services for all.
